THE BLUE MONKEYS' WHITE PAPER, MISSION STATEMENT...

THE MISSION

The world as we know it has become one big oasis of technology. Take a look around you Just a moment, reflect on what I have to say. The whole world is digital.

Work from factories to laptops, boardrooms to zooms. Your followers are your new neighbors and friends, And filters are the new make-up. Where to find like-minded people? Twitter, LinkedIn etc. How about games and sports? Fortnite, COD. Gaming skins are the new skinny jeans, Personally, I find them extremely sleek and hot.

The metaverse is beyond any of us. I get it, we all want to feel what it's like to be in space, Armed and battling virtual enemies, but what happens when the whole earth is extinct and we have nothing to remember it by? We are creating a world that is virtual yet Earth-like, one where even disabled people can be free from the confines of their wheelchairs and race like they were never disabled. A world that feels so much like home, yet is extremely different and calming. BLUE MONKEYS, THE JUNGLE WARRIORS. Our mission? To create a world where our imaginations run wild.

A close-knit community. A Community With one goal: Prevent an invasion of humans that would extinguish our Race and world.

Coming together to create a completely decentralized and community driven system that works. Our Mission is to build a Topnotch protocol yet keep it earth-like using modern and innovative equipments and boost the \$BLUE token value during the development process.

"Step into a world like no other. One with incredible possibilities. A world where our imaginations can run wild."

ABSTRACT:

The Year is 2164, and the Humans are our greatest enemy.....

Imagine a world without the worries of earth, one that is filled with sentient humanoids who speak a unique language, life in a beautiful virtual Rain forest that is inhabited by a race, no division, no drama.

WELCOME TO PANDORA.....

The Blue monkeys is inspired by a Sci-Fi movie. It tells the story of a people that stood united in the face of adversity. Treated as Aliens, they fought to retain their place in pandora.

It will bring sentimental feelings from this movie and will bring people from all spheres of the cryptoverse to form one Race. Leveraging on the mechanics and expertise of the developers, and depending on Ey-wa(our deity),a network of users will be built.

BLUE MONKEYS, THE JUNGLE WARRIORS

IT is a Sci-Fi Economy development Play 2 Earn adventure game, NFA and DeFi ecosystem with traditional finance features and benefits on the Metaverse. Made completely different from other virtual games in existence, it is designed to be a Na'vi styled game. The year is 2164, there exists a race of sentient extraterrestrial humanoids [Na'vi] on a moon planet called Pandora. It's a peaceful planet that lies upon over \$100 billion worth of Unobtanium. Peaceful until humans begin a mining colony that threatens the existence of the Na'vi. Indigenes of this lush jungle are called Omaticayans.

THE HOMETREE

Our Physical server will be called "HOMETREE"

ECOSYSTEM

VIRTUAL GAMING

Every Nation needs a president, every county, a Baron, every village, a ruler. That being said, Players will be able to buy ownership of a clan, meet a suitable partner and create a lineage of Clan rulers. Clan rulers will be known as "Eytukan", There will be 5 CLANS in pandora. The Omaticaya clan, The Tipani clan, The Tawkami clan, The Kekunan clan, and the Huyuticaya clan. The Toruk Maktos are considered great warriors and leaders. The Toruk makto title will be given to the first 2000 clan members that interact with the ecosystem. Citizens will experience virtual hunting in pre-colonial African and Na'vi Avatars/skins. We will be launching our gaming and Metaverse platform on Ethereum Layer 2 "Polygon" to ensure easy access and reduced fees.

NFTs(GAMING AVATARS AND DIGITAL ARTS)

Blue monkey avatars will be available for sale on decentraland to people who like pre-colonial African skins. The rarest skins will be available on auctions and \$BLUE token will be the currency of exchange. NFT Avatars are needed to activate characters in the game. The rarer the NFT, The more sophisticated a character.

NFTs can also be used to purchase Collectibles, Energy boosters and more armors. Game collectibles can be bought on our marketplace with the \$BLUE token. To unlock more sophisticated equipment in the marketplace, the In-game token must be purchased. The rarest NFT collection, "EYTUKAN" are Generational NFTs that can be crossed with the female variants to purchase another generation of NFTs. Clan leaders can purchase NFTs that generate, i.e Newborns to continue the lineage.

A specially curated collection of digital art and content by our extremely talented artists will be available for minting as well. NFTs can be purchased, staked, and sold for the native token (Terms and conditions applied).

NFAs(Virtual Lands)

Virtual assets can be acquired through auctions, games, and direct purchase within the ecosystem. The NFA platform is an integral part of the BLUE ecosystem. BLUE will partner with leading Brands that deal in the sale of virtual estates and lands on decentraland, we will also partner with renowned global Virtual artists/architects, designers and producers to create unique designs of virtual designs and content that will be exclusively accessible to BLUE Token holders. The ultimate aim is for the platform to also facilitate the representation of unique, real world assets through tokens on the blockchain.

STAKING VAULTS

Instead of holding your \$BLUE tokens in your exchange or personal wallet, with BLUE's Staking Platform you can put your tokens to work and generate staking rewards.

At the core of this ecosystem will be Blue monkey's native token, \$BLUE.

10% of the total supply of the BLUE token will be reserved as incentives and rewards. These rewards are distributed to BLUE stakers over a period of 6 months. Along with this, a part of the fees generated by the BLUE MONKEY DEX will be used to buy-back BLUE tokens from the open market and distribute it to the stakers via the Staking Platform. Any and all buybacks performed are done for purposes of increasing liquidity, providing a more finely tuned market supply, which leads to a healthier token economy. We believe the token holders are the most important participants in any crypto ecosystem, and therefore the interests of BLUE Token holders will always be prioritized, for being an integral part of BLUE MONKEY's journey.

DEX

Dex is short for "DECENTRALIZED EXCHANGE". A Dex allows you the comfort of knowing your funds are securely in your hands, without the worries a centralized exchange brings. The most important benefit is the security a DEX provides, by not requiring you to hand over control of your crypto assets to the exchange. In an industry where centralized exchanges seem to experience hacks, have lawsuits filed against them, or get raided by authorities all too often for comfort, a DEX is god. A Dex is also permissionless, which means you don't have to pay ridiculous amounts of money to be listed on it.

Our goal is to provide ease of entry to DeFi. Our Dex will be created and open to all who has a similar interest. Omaticayans will decide which projects should be listed on our Dex through thorough vesting. Revenues will be gotten through slippage, etc.

BLOCKCHAIN MECHANICS

Metaverse and gaming currency
(\$BLUE)

Automatic Liquidity provision

NFT collation, creation and ownership

Staking Pools(NFTs and Currencies)

MultiChain (BSC, Polygon, Solana, FTM, AVAX)

Burn and Buy Back mechanism

VSP / 3RD party xr plugin

ENVIRONMENT

3d environment and 3d model

PLAN

The game concept is similar to the Blue Monkeys movie. It will have a futuristic look with futuristic objects like spaceships, Space Mining colony.

CAMERA

It will be set to a first person view, as that's the idea or virtual reality. (The camera will be on the game eye). VR Headsets will be used during beta to test it.

WEAPONS

Since the main characters are the blue avatar, they will make use of melee weapons such as spears which will be found on a bushy background, (The Jungle). The weapons will be highlighted when close to make it look distinct. Upon picking it there will be a pickup animation implemented. The range of attack will vary for the different weapons, as well as the damage impact.

PLAYERS

According to the VR setup, we are going to use a First-Person View. The players are The Blue monkeys, and a few bots in human skins. The weapon he/she picks up will be displayed on his hands and the player will only use melee weapons. There would be a pre-set animation already created for each event that the player can perform. We will then use the animator controller to control the animation events.

ENEMIES

The enemies are humans, they are going to be using some trajectory weapons such as guns that moves at a slower pace for the players to be able to react to them and act on reflex. Some Enemy AI will use stronger weapon that have higher impact on health while some will use faster weapons but lower impact on health.

NFT ART MARKETPLACE

The BlueMonkeys project has a unique and interesting NFT concept that drives community engagements. There will be two(2) NFT categories centred on the Metaverse concept and game. EYTUKAN Avatar The first category of The BlueMonkeys NFTs(**EYTUKAN**) are extremely rare and has extraordinary features. This set of NFTs very limited supply and will only be available through our dedicated sale page. **EYTUKAN** NFTs will have two(2) species; Male and Female(**MO"AT**) variants. Any player that wants to play our NFT Metaverse game will have to possess at least one pair of the Clan(Male and Female). Having a pair will allow a player to breed new generations of our NFTs and earn the \$Blue Tokens. Holders of EYTUKAN NFTs will also be able to stake them and earn \$Blue Tokens. The APY will be determined and announced upon launch.

(**NINAT**) This is the second category of The Blue Monkeys NFTs. These set of NFTs are second generation and can only be acquired through breeding. Only holders of at least a pair of Clan NTFs can breed new generations and can also list them on NFT marketplaces. New generation NFTs can be sold and trained to become Clan NFTs and eventually breed newer generations. Each time a new generation of this NFT is created or fed, the \$Blue Token is burnt permanently which reduces the number of tokens in circulation. A new generation can only be staked after reaching a particular age which shows it is mature enough to enter the jungle and hunt for unique rewards.

**NFT EYTUKAN COLLECTION (RAREST) SNEAK PEEK
TSE'HUK**

MO'AT

TOKENOMICS

ECOSYSTEM CURRENCIES

The In-game and ecosystem currency is the \$BLUE token. It will be used to carry out all actions and transactions on the platform, from Purchasing NFTs, VR gaming skins, unlocking new features on the game, to acquiring ownership of Non-Fungible Assets(NFAs) and Staking. ILO will be \$BNB as our first blockchain is on the Binance Smartchain Network.

We will be launching our gaming and Metaverse platform on Ethereum Layer 2 "Polygon" to ensure easy access and reduced fees

Token Name:	BLUE MONKEYS
Ticker/Symbol:	\$BLUE
Decimal:	TBA
Contract Address:	TBA
Network:	BINANCE SMART CHAIN
Total supply:	1,000,000,000

TOKEN DISTRIBUTION

Total Supply	-	1,000,000,000	
Liquidity and Exchange listing	-	100,000,000	10%(Initial Liquidity)
Marketing & Development	-	100,000,000	10%(30% Monthly release)
Incentives and Rewards	-	100,000,000	10%(Locked for 90 days)
Team	-	50,000,000	5%(Vested at 10% monthly release)
Burn	-	245,000,000	24.5%(To reduce total supply)
Airdrop	-	5,000,000	0.5%(T/Cs applied to prevent dumping)
Sale	-	400,000,000	40%(Whitelisting for seed sale will be open for the duration of 10 minutes, after which it will be closed and sale will be made public)

REVENUE

To keep our world flourishing, we'll open commerce on the metaverse, purchase a plot of virtual land on "Fashion street" ,Decentraland and trade Na'vi Avatars to other citizens of the metaverse who are not Omaticayans.

All the fees and revenues from the protocol will be sent to the liquidity pool, as we'd initiate a buy back and burn mechanism. This would create a solid floor price for the ecosystem.

Using New Mechanics, we'll create a Virtual game that combines real world and virtual space. Our game will be designed within pandora and all activities will be set in the year 2164.

\$BLUE will launch two different collections of NFTs. The **TSE'HUK** collection, A collection of Male Avatars and the **MO'AT**, A collection of female Avatars. In Q3, We'll purchase our virtual space for our Avatar collection on decentraland. To fix the problem of ridiculous fees for Minting, we'll Create our own NFT marketplace and divide the revenue into a 50/50%. 50% to holders and 50% to ecosystem development. stakeholders of \$BLUE will decide on which NFT artists and artworks will be on-boarded

Revenue from Digital arts, contents, assets and The Dex will be put into ecosystem development. Staking pools and vaults for \$BLUE tokens and NFTs will be made available. Vaults for different products. I.e NFT Vaults to stake NFTs and harvest NFTs, Vaults for tokens, i.e stake \$BLUE and earn \$BLUE
